It's a species of beasts born from the adaptation of a northern beast that feeds on mist-like things to a southern environment.
It sucks in the "colorful mist," which contains moist miasma, through its many holes, and exhales a dry wind that has lost its supernatural properties.

霧状の物体を飼糧とする北国の妖獣が、南国に渡った末に環境に適応したことで生まれた獣種。
湿った瘴気を含んだ色彩霧《colorfulmist》をたくさんの穴から吸引し、超自然性の喪失した乾いた風を吐き出す。
